

# Texas Southwest Floors

*Luxury Vinyl Tile Flooring*

**Value. Integrity. People.**

## Lonestar and Quarry Collections

Our newest introduction to our portfolio of products is our own Luxury Vinyl Tile Collection. Following our tradition of providing products to our Customers that ensure quality and value, our Lonestar and Quarry Plank Collections offer low maintenance and mass appeal. Our Lonestar Collection Offers a variety of visuals recreating the natural characteristics of wood and our Quarry Collection captures the very appearance of different stone varieties.

With a special polyurethane coating (8 mil clear wear layer) to reduce maintenance and special texturing to provide longevity we are certain Texas Southwest Floors has the product to meet all of your multi-family needs and exceed all of your expectations of a luxury vinyl floor.

## NEW Eco-Quiet Plank

Texas Southwest Floors is proud to introduce one of the most revolutionary new products our industry has ever seen: Eco-Quiet, our Lonestar/Quarry luxury vinyl plank with a rubber-backing. This new plank saves time and costs, and more importantly eliminates the finger-pointing that ensues when using a separate sound underlayment with a finished flooring.

Eco-Quiet is a finished plank with a 3mm sound underlayment that is permanently attached during the manufacturing process, eliminating the need for dual installations, multiple adhesives and lengthy installation times. With a recycle content of 60%, you can feel good about your decision. Eco-Quiet has an IIC rating of 54, so there is no need for a sound-dampening underlayment. Eco-Quiet is truly the ideal product that meets the sound requirements of a building without sacrificing your budget, time, or design.
